The Amity Township supervisors awarded a \$58,190 contract to Barrasso Excavation of Fleetwood to install new flow meters at sewer pumping stations at Lake Drive and Hilti's Lane.

The meters will allow the township to access flow data in the municipal office.

In other business Wednesday, the supervisors agreed to enforce no-parking zones at the township building due to problems caused by sporting events in adjacent fields.

A suggestion by Supervisor Terry Jones to inspect properties being transferred to new owners was rejected by the board.
